

Fr. Ray Vocational School for the Disabled

Nickname: Es

Sex: Male

Birth Date: 1989.11.11

Birth Place: Udon Thani

Arrival Date: 2009.11.06

Family History and General Information

Es came from Udon Thani, a province in the northeast of Thailand. His parents are rice farmers and grow other crops according to the seasons. There are 6 people in his family, Es, his parents, his grandmother on the mother's side, his sister who is now 14 years old and attending the government school, and his brother who is a year of age.

When Es was in Year 8 at school, he had a motorcycle accident. He collided with the mileage post whilst riding his motorcycle. He was treated in Khon Kaen Hospital initially for 2 months and then was transferred, and admitted to Wangsamor Hospital for a month and 9 days. His left arm and left leg became weak. Having been fed liquid food by a G Tube in the hospital, he now has a fading scar on his neck and he has a big scar on his forehead.

Es has finished Year 6 of school. He has suffered from asthma since he was young. His physical disability prevented him from attending school. He did not carry on his studies further after the accident. He just stayed at home and gave some help to his parents with the farming.

He learnt about our School from the teacher of our new project, the Redemptorist Vocational School for the Disabled in Nongkhai. He is very glad to have been accepted, after passing the entrance exam on his first attempt. He is now in the Electronics Shop Owner's course.

November 2009

After staying at our school for 15 days, Es is very happy to restart his education. He says it is time for his brain to work after he has not used it for a long time. Coming to our School with

hope, he dreams that he will get a proper job after his graduation and then he will be able to support his siblings and allow them to be well-educated. At School, he finds that he has no problems with his studies. He feels that the teachers are very good at advising and guiding the students. He enjoys the fact that all students help one another in all areas. He feels that they are all like one big family who support one another.

Es is a very well spoken, cheerful young man. He would like to say thank you to the sponsors for giving the disadvantaged people a great opportunity to better themselves and allow them to achieve a solid position in the community and not be a burden on society. (WS)

April 2010

In the 2nd school term covering November 2009 through March 2010, Es was able to do fairly well in his year-end examination, which took place last month in March. His overall average grade for this school term was 56.69%. Of 6 subjects; Es earned 1 B in Elementary Electrical Appliances, 1 C in Elementary Computer, 2 D's in English and Life and Society, and 2 E's in Wireless Receiver and Elementary Measuring Gauge. Es was commended for being attentive in his study and for participating in all of our school's activities. Es is being required to re-sit in 2 subjects with an "E" grade at the start of the new school year in May. Es is also reminded to be involved in necessary physical therapy to improve and to strengthen his left arm and leg. We shall be looking forward to his return to resume his vocational training when the next school year will start in May. (NS)

October 2010

Prior to the end of the 1st term for this school year ending in September, Es sat for the examination of 5 subjects. The followings are the result of his examinations: EE201 English – 53 (D), ES201 Television Repair – 50 (D), ES205 Signal Tester and Electrical Repair – 52 (D), ES206 Audio – 46 (E), ES207 Computer Repair-Basic – 52 (D), and LS201 Life and Society – 41 (E). Total overall average grade – 49.00

In this school term, Es had shown some interest in his academic study as well as his vocational training however he seems to have lost interest in his education. This reflects clearly in the outcome of his examination. On the other hand, he displays good behavior and courtesy. Being a responsible student he abides by the School's existing rules and regulations. He also participated enthusiastically in our School's activities.

We are expecting to see Es return from his holiday, healthy and with a good desire to improve his grades this term. (NS)

April 2011

The school's year-end final examination took place towards the end of March and Es was able to earn the following grades:

EE301 English –	57.00	D
ES301 Advanced Television Repair –	56.00	D
ES305 Advanced Computer Repair –	45.00	E
ES306 Vision Player and Satellite Antenna	54.00	D
LS 301 Life and Society –	54.00	D
While the year-end final overall average grade was	55.80	

Es displays general good behavior and conduct. He also takes an active part in our School's

activities. He is always found to be quite responsible for the school work assigned to him

Nevertheless, Es is suffering with his short memory which in turn causes him to lack enthusiasm in his vocational training as well as in his study as evidenced in his below standard school's year-end final examination. He shall need to re-sit the examination in which he had low scores before being allowed to continue on with his work apprenticeship at the start of the new school year in May (1/2554). The school administration is doing its best to encourage each and every student to utilize their time to the best of their ability helping themselves as well as the community. (NS)

October 2011

Congratulations to Es! He completed his Electronic Shop Owner's course in September with a 63.50% average. He was able to obtain 60% in Field Work and 67% in Life and Society. He gradually learned in classes and bravely asked when he did not understand the lessons. He kindly helped his friends and cooperated well with all our planned activities. He found good employment with the help from our Job Placement Center. On the 5th of October 2011, he started to work as an Electrician at Saha Seiren Company Limited. We wish him great success in his new position. (WS)
